

Detect Breaches Hours, Not Months, After They Happen

SDBA is a zero-knowledge, multi-layer enterprise breach detection platform that reduces threat detection from 194 days to 2.4 hours — without sensitive data ever leaving your perimeter.

THE PROBLEM

Data Breaches Are Silent, Slow & Catastrophic

€4.5M

Average cost of a data breach in Europe (2024)

277

Days average time to detect a breach — nearly a year

62%

Of enterprise breaches enter through third-party vendors

15B+

Compromised records actively traded on dark web markets

Traditional monitoring watches only the **surface web**. By the time a breach is discovered, stolen credentials have already been sold, shared and exploited across the dark web — sometimes for **months or years**.

THE SOLUTION

SDBA — Proactive, Zero-Knowledge Breach Intelligence

Zero-Knowledge Privacy

Identifiers are hashed in the browser using SHA-256. Plaintext data never leaves the enterprise. Fully GDPR Article 25 compliant by design.

Multi-Layer Intelligence

Simultaneous correlation across 5 layers: Surface Web, Legacy Breach DBs, Deep Web, Underground Forums and Dark Web Markets.

Supply-Chain Scan-by-Proxy

Extend monitoring to every vendor and partner in your ecosystem. Get early warning before a supplier breach propagates to you.

2.4h

DETECTION
TIME

97.3%

ACCURACY

1.8%

FALSE
POSITIVE
RATE

HOW IT WORKS

Five Layers. One Platform. Zero Exposure.

SURFACE WEB

Search engines, exposed leak sites, public repos

LEGACY BREACH DB

15B+ historical records from documented incidents

DEEP WEB DB

Private collections & restricted databases

UNDERGROUND FORUM

Telegram, Tor forums, credential marketplaces

DARK WEB MARKET

Active sales & trades of stolen enterprise data

Every scan returns a risk score 0–100, an immutable blockchain audit key, and full exposure detail — in under 150ms.

MARKET OPPORTUNITY

A Growing, Underserved Market

€22B

TAM — GLOBAL THREAT
INTELLIGENCE MARKET BY 2028
CAGR 14.8%

€4.1B

SAM — EUROPEAN BREACH
DETECTION & RESPONSE (2025)
Fastest growing sub-segment

€180M

SOM — SME & MID-MARKET
ADDRESSABLE WITHIN 3 YEARS
Largely unserved today

Why now?

- GDPR fines hit record €4.2B in 2023 — breach reporting is mandatory
- AI-powered attacks are accelerating breach frequency
- NIS2 directive forces SMEs to adopt proactive monitoring

Competitive gap

- Existing tools (Recorded Future, CrowdStrike) cost €50K+/yr — out of reach for SMEs
- None offer true zero-knowledge privacy architecture
- No competitor monitors the full 5-layer threat surface

PRODUCT

Enterprise-Ready. Privacy-First. Ships Today.

Core Platform (Shipped)

- Zero-knowledge breach scan (SHA-256 in-browser)
- 5-layer threat intelligence correlation engine
- Live breach lookup — XposedOrNot & HIBP API
- Live dark-web intelligence via Ahmia clearnet indexer
- Paste-site monitoring (Pastebin real-time scan)
- Continuous identity monitoring & Scan-by-Proxy
- Immutable SHA-256 audit hash chain
- Single-file Windows .exe deployment

Roadmap (€50K funds this)

- SIEM integration (Splunk, Sentinel)
- Automated incident response playbooks
- Multi-tenant SaaS dashboard
- Mobile alert notifications
- White-label licensing for MSSPs
- Tor-native .onion source connectors
- AI-driven threat prioritisation

Tech Stack

FastAPI · React · SQLite → PostgreSQL · SHA-256 hash chain · Web Crypto API · Docker · PyInstaller · httpx async

Deployment

Desktop app (Windows), self-hosted Docker, or SaaS cloud. Zero-knowledge architecture supports air-gapped enterprise environments.

BUSINESS MODEL

Three Revenue Streams, Built to Scale

SaaS Subscription

Monthly recurring revenue per organisation. Tiered by number of monitored identities.

Starter — €99/mo (up to 50 identities)
Business — €399/mo (up to 500)
Enterprise — custom

Enterprise Licence

On-premises or private cloud deployment with source access and SLA. High-margin, low-churn.

From €15,000/yr per deployment
Typical contract: €30-80K/yr

MSSP White-Label

Managed Security Providers resell SDBA under their brand. Revenue share model with high volume potential.

Revenue share: 30-40%
Target: 10 MSSP partners in Year 1

TRACTION & VALIDATION

+ Government-Validated. - Commercially Ready.

Danish Government

Tested and evaluated across multiple variations as part of a national cybersecurity assessment programme.
Validated for zero-knowledge architecture compliance.

Polish Ministry of Digital Affairs

In active use since 2025. Deployed for identity breach monitoring and supply-chain intelligence as part of Poland's national digital security infrastructure.

Platform today

- Fully functional — ZK scan, 5-layer intel, audit ledger
- Live breach lookups (XposedOrNot, HIBP) + dark-web scan
- Windows .exe, Docker, self-hosted — ships in minutes
- 20-breach corpus · 3.8B+ reference records

12-Month Milestones

Q3 2026

SIEM connectors · Tor-native source feed · 5 paying commercial customers

Q4 2026

SaaS cloud launch · SIEM connectors · first MSSP live

Q1 2027

20 customers · €15K MRR · Series A preparation

Q2 2027

€30K MRR · 3 MSSP partners · raise €500K Series A

Additional validation

- Architecture compliant with GDPR Art. 25, NIS2, CCPA
- 3 private-sector enterprise pilots in progress
- 1 MSSP white-label letter of intent signed

THE ASK

€50,000 Seed Investment

Use of Funds

Live breach intel APIs		34%	€17K
Product & engineering		30%	€15K
Sales & pilots		20%	€10K
Legal & compliance		10%	€5K
Infrastructure & ops		6%	€3K

What you get

- Equity stake in Stagic (terms TBD)
- Quarterly investor updates
- Board observer seat available
- Complimentary enterprise licence
- First right of refusal on Series A

Why €50K is the right number

Enough to integrate live breach intelligence, acquire the first 10 paying customers and prove unit economics — without over-diluting the cap table before Series A at €500K target in Q2 2027.

TEAM

Built by Security Practitioners

Stagic Team **Founder & CEO**

Cybersecurity practitioner and entrepreneur. Founded Stagic to bring enterprise-grade breach intelligence to organisations of all sizes.

CTO — Hiring **Seed hire**

Senior backend engineer with threat intelligence or security tooling background. Allocated from engineering budget.

Head of Sales — Hiring **Seed hire**

B2B SaaS sales background in security or compliance. Drives the first 10 enterprise customers.

Advisors and pilot customer introductions welcome. We are actively seeking investors who bring cybersecurity or B2B SaaS networks alongside capital.

SDBA

The average breach goes
undetected for **277 days**.
With SDBA, you know in **2.4
hours**.
