

Know Before You're Breached

SDBA is a zero-knowledge, multi-layer enterprise breach detection platform that reduces threat detection from 194 days to 2.4 hours — without sensitive data ever leaving your perimeter.

NEARLY A YEAR

62%

OF BREACHES ENTER THROUGH
THIRD-PARTY VENDORS

15B+

RECORDS TRADED ON DARK WEB
MARKETS TODAY

Traditional tools monitor only the **surface web**. By the time a breach is discovered, stolen credentials have already been sold, shared and exploited — sometimes for **months or years**. Organisations need proactive, multi-layer intelligence — not reactive alerts.

THE SOLUTION

SDBA — Proactive, Zero-Knowledge Breach Intelligence

🔒 Zero-Knowledge Privacy

Identifiers are hashed in the browser (SHA-256). Plaintext data never leaves the enterprise. Fully GDPR Article 25 compliant by design.

🔍 Multi-Layer Intelligence

Simultaneous correlation across 5 layers: Surface Web, Legacy Breach DBs, Deep Web, Underground Forums and Dark Web Markets.

🔗 Supply-Chain Proxy Scan

Extend monitoring to every vendor and partner. Get early warning before a supplier breach propagates to your organisation.

2.4h

FASTER THAN INDUSTRY AVG

HOW IT WORKS

Five Layers. One Platform. Zero Exposure.

Every scan returns a risk score 0–100, an immutable blockchain audit key, and full exposure detail — in under 150ms.

MARKET OPPORTUNITY

A Growing, Underserved Market

€22B

TAM — GLOBAL THREAT INTELLIGENCE BY 2028

CAGR 14.8%

€4.1B

SAM — EUROPEAN BREACH DETECTION (2025)

Fastest growing sub-segment

€180M

SOM — SME & MID-MARKET IN 3 YEARS

Largely unserved today

Why now?

- GDPR fines hit record €4.2B in 2023 — breach reporting mandatory
- AI-powered attacks accelerating breach frequency
- NIS2 directive forces SMEs to adopt proactive monitoring

Competitive gap

- Recorded Future, CrowdStrike cost €50K+/yr — out of SME reach
- None offer true zero-knowledge privacy architecture
- No competitor covers the full 5-layer threat surface

PRODUCT

Enterprise-Ready. Privacy-First. Ships Today.

Core Platform — Shipped

- Zero-knowledge breach scan (SHA-256 in-browser)
- 5-layer threat intelligence correlation
- Continuous identity monitoring
- Supply-chain Scan-by-Proxy
- Immutable SHA-256 audit hash chain
- Breach alert system with triage workflow
- Single-file Windows .exe — no installation

Deployment

Desktop (.exe), self-hosted Docker, or SaaS cloud. Supports air-gapped enterprise environments.

Roadmap — €50K funds this

- Live HIBP k-anonymity API integration
- Real dark-web crawler connector
- SIEM integration (Splunk, Sentinel)
- Automated incident response playbooks
- Multi-tenant SaaS dashboard
- White-label licensing for MSSPs

Tech Stack

FastAPI · React · SQLite → PostgreSQL · SHA-256 hash chain · Web Crypto API · Docker · PyInstaller

BUSINESS MODEL

Three Revenue Streams, Built to Scale

SaaS Subscription

Monthly recurring revenue, tiered by monitored identities.

Starter €99/mo · Business €399/mo · Enterprise custom

Enterprise Licence

On-premises deployment with source access and SLA.
High-margin, low-churn.

From €15,000/yr · Typical contract €30–80K/yr

MSSP White-Label

Managed Security Providers resell SDBA under their brand.

30–40% revenue share · Target 10 MSSPs in Year 1

TRACTION & VALIDATION

Government-Validated. Commercially Ready.

Danish Government

Tested and evaluated across multiple platform variations as part of a national cybersecurity assessment programme. Validated for zero-knowledge architecture compliance.

Polish Ministry of Digital Affairs

In active use since 2025. Deployed for identity breach monitoring and supply-chain intelligence as part of Poland's national digital security infrastructure.

Platform today

- Fully functional — ZK scan, 5-layer intel, audit ledger
- Ships in minutes · Windows .exe + Docker + SaaS
- 3 private-sector enterprise pilots in progress
- 1 MSSP white-label letter of intent signed

12-Month Milestones

Q3 2026

Live breach intel API · 5 paying commercial customers

Q4 2026

SaaS cloud launch · SIEM connectors · first MSSP live

Q1–Q2 2027

20 customers · €30K MRR · raise €500K Series A

THE ASK

€50,000 Seed Investment

Use of Funds

Live breach intel APIs		34%	€17K
Product & engineering		30%	€15K
Sales & pilots		20%	€10K
Legal & compliance		10%	€5K
Infrastructure		6%	€3K

What you get

- Equity stake in Stagic (terms TBD)
- Quarterly investor updates
- Board observer seat available
- Complimentary enterprise licence
- First right of refusal on Series A

Why €50K?

Enough to integrate live breach intelligence, acquire the first 10 paying customers and prove unit economics — without over-diluting before Series A at €500K target in Q2 2027.

TEAM

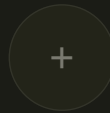

Built by Security Practitioners

Stagic Team

Founder & CEO

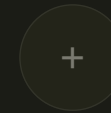

Cybersecurity practitioner and entrepreneur. Founded Stagic to bring enterprise-grade breach intelligence to organisations of all sizes. Track record of government-level deployments.

CTO — Seed Hire

Engineering Lead

Senior backend engineer with threat intelligence or security tooling background. Allocated from engineering budget.

Head of Sales — Seed Hire

Revenue Lead

B2B SaaS sales background in security or compliance. Drives the first 10 enterprise customers to MRR.

We are actively seeking investors who bring cybersecurity or B2B SaaS networks alongside capital. Advisor introductions and pilot customer warm intros especially welcome.

The average breach goes undetected for **277 days.**
With SDBA, you know in **2.4 hours.**
